Summary

A creative and detail-oriented software engineer with a passion for building elegant, user-centric web applications from the ground up. Leveraging a strong foundation in JavaScript and modern front-end technologies, I specialize in transforming complex ideas into responsive, interactive digital experiences. I am eager to apply my skills in a collaborative environment to solve real-world problems and contribute to high-impact projects.

Technical Skills

Languages: HTML, CSS, JavaScript, Python, TypeScript

Frameworks & Libraries: Rails, SASS

Tools: Git, GitHub, VS Code

Projects

Machines

As the sole developer, designed and implemented a conceptual platform for car enthusiasts to buy and sell vehicles, featuring a sleek, modern interface.
Technologies: HTML, CSS, JavaScript

Brain Freeze

As the sole developer, created a vibrant and responsive website for a local ice cream shop, focusing on a fun user experience from concept to deployment.
Technologies: HTML, CSS, JavaScript

Expense Tracker

Developed an intuitive tool to monitor income and expenses, helping manage budgets effectively.
Technologies: HTML, CSS, JavaScript

Education

Moringa School - Software Engineering Bootcamp
